

Darren T. Misk,

Thank you for all your hard work
It seems like my problems started
about 10 years ago. Wrote a check
one day for \$400⁰⁰ & the business
called & said it bounced. We called
the bank right away, & they said they
were not able to tell me why, finally
she said it was the I.R.S. froze my
account. This was a personal account.
My corporate business account was okay.
About a year later I opened another
personal account & 3 months later the
something happened.
We received a letter from a tax solution
company & signed up for their program & a year
later more money was gone & nothing was
solved.

We heard about Darren Misk from a
friend & met with Darren & things went
uphill from there.
I had the pleasure to work with Daniel
Genet & Barry Wilson.

[REDACTED]

Once things were moving along it seems like it took forever. After avoiding the I.R.S. for 30 years I wanted it settled in 30 days.

With Barry working on the numbers & Daniel with the I.R.S., they turned a miserable experience into a great relief.

The results were amazing, owing \$188,000. with a settlement of \$1500.

We should have done this 10 years sooner. If you need help you're at the right place. Do it now.

Thanks Again
